

# Pebble Activity Device

## Reward your employees for taking active steps to a healthy lifestyle – and they don't need to log a thing!

The beBetter® System offers built-in integration with the wellness industry's leading activity device, the Pebble by Fitlinxx. The most accurate and easy-to-use device of its kind, the Pebble is a wireless, all-day activity tracker that motivates employees to be active anytime, anywhere. The small device clips to an individual's shoe or belt, fitting seamlessly into daily life. It gives people credit for every decision they make to be more active, such as taking the stairs instead of the elevator or parking farther away from buildings.

The Pebble collects data as the employee walks, runs and moves about their day, then automatically and wirelessly sends it to beBetter via Access Points set up in the worksite. (Remote employees can sync at home, and it can also sync with iOS phones and devices.) Employees can then log on to beBetter and view their activity information and their progress toward their physical activity goals.

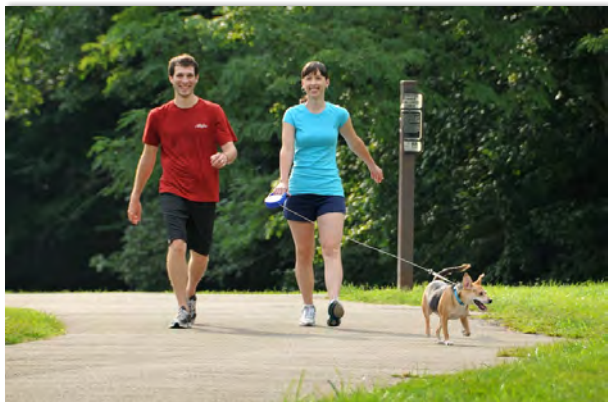

### Effortlessly Track

- Steps taken
- Calories burned
- Distance traveled
- Total activity time

### Features

- Clip it on and go - no buttons!
- No charging, docking or syncing - data just happens!
- Simple and convenient

**The Pebble provides accurate, objective data for goal progress, incentive rewards, and program evaluation.**
